ARTIST STATEMENT

In his large-format works, David Mildner examines different forms of communication, paths through unseen structures and tools and devices to that end. Here he places the dynamics between the works and it’s observer at the centre, thereby challenging and provoking both himself as the artist and the observer in their mode of empathetic self-conception, but without losing the analysis of this act. David Mildner is an artist that remains in control of these experiments and purpose the entire experimental arrangement. "In my works, I try to create a timeless psychological projection surface on which mental non-places emerge through a concentrated convergence of worlds and ideas." It is in these mental non-places or non-worlds where his works ultimately manifest themselves to the beholder.
