2008 Sommeratelier (including solo exhibition) - Kunstverein Greven - Greven - DE

Fellowships

2018 Goldrausch Künstlerinnenprojekt - Berlin - DE

ARTIST STATEMENT

The themes of my paintings are built environments or architectural details. During the research phase I photograph these objects to use as a conceptual sketch. On the basis of these photos, I develop compositional drawings, usually applying several levels of abstraction. This is the foundation of my painting process. Within my work I reduce the urban space to contain only monolithic architecture in front of a wide horizon. The sculptural role of architecture in a landscape allows me to focus on the two central aspects of my paintings: color and light. Within the strict framework of the composition I grant myself more freedom to experiment with the painting process. Abstract and gestural areas alternate between each other, complement each other and affect the composition of the painting. I experiment with the materiality of oil colors in different states - liquid or pastose. The surfaces vary between solid and dispersing. Currently I am researching distinct architectural styles in post-war modernism and the so-called „Brutalism“. The overlay of utopian concepts, reality and ruin creates a field of tension for my painting.
