ARTIST STATEMENT

In my artistic work I experiment with different collage techniques. I work with elements such as old magazines, colored papers, tape and photographs. It is important to me to create specific moods and transmit new stories to the viewer. My travels around the world have been an exciting mix of new experiences with all kinds of people and a journey of self discovery. I use my work as an constant search to interpret my own ideas. With this artwork, I want to reinterpret the diversity of the human being. I use mixed media to show one of my greatest inspirations, the diversity of traditions in our environment. I deal with this theme through various faces, cultures and icons. Old icon paintings fascinate me and I have interpreted the "spiritual" craft in a new way through the assembling and gluing of images. The result of this mashup artwork are strange and unexpected combinations.
