ARTIST STATEMENT

"Giuditta's artworks are made with graphite and mixed techniques on cardboard. Her project presents a psychological map and spiritual landscape of the human being, and unmasks the false appearances that conceal the true nature of human reality. What better way to peer into this current human stage of evolution than to see firsthand dark and classical portraits laden with stirring, nostalgic and elegiac memories, dream states, nightmares and other hidden layers. The subjects in Giuditta's art undergo a powerful self-examination. Her research delves into the inner human landscape to explore its depth. These universal "portraits" offer keen insight into complex human emotions, behaviors and cognition. They deeply reflect on the current state of the individual and collective unconscious, transcending cultural stereotypes and barriers." Alan Freshman, New York
