ARTIST STATEMENT

Born in Moscow, Russia, Mischa moved to Germany at a young age and now lives and works in Berlin. He has been active as a photographer for over 20 years. His work has been largely concerned with subjects that contrast their surroundings; finding moments of beauty & tranquility in places that one wouldn't usually expect to find them. Mischa's 'Blurred" series was shot entirely at night, within urban landscapes - which are usually hectic and demanding. These photographs allow us to step back from the chaos of everyday urban life and stop, just to look and enjoy; to see the beauty in things one would normally rush past without a second thought. His photographs invite the viewer to rest for a moment, let their mind wander, and find their own peaceful haven.
