ARTIST STATEMENT

Nicoleta Albei-Wigger has been living in Berlin for 20 years and is a freelance artist. Her acrylic paintings speak about the movements of life and people. Her art is to paint pictures that emerge from her emotional world and thus create a coherent overall art work as a step-by-step process. This creates color explosions of dark and radiant tones, which makes up the charm of her work. Exploding colors and subtle sensuality are only a small part of what Albei-Wigger wants to express in her pictures. When looking at the large-scale acrylic works, the result is a moment when the subtlety of the motif becomes gradually recognizable. In many cases, it is only after several careful inspections, then suddenly the suspicion comes up, perhaps something has been overlooked. A face or figure. Hidden in the color universe and yet again made visible through this. Everything the artist paints is associated with the joy of life.
