Works in private collections in Moscow, Berlin and Vienna

ARTIST STATEMENT

Nikita Zhukovskiy is an emerging transmedia artist working on the intersection of queer theory and digital arts. Combining metal handwork with industrial robotics craft, innovative sound gear mechanics with contextual research methods, experimental approach to video and layers of digital to analogue conversion he creates a narrative through multimedia installations addressing issues of identity politics, subjectivity of perception, meaning of action and safety in public and private spaces, and the notion of borders between them.
